- NCR-2746 – Archive daily automatic backup from iView server to FTP server fails when it executes at same time as archive backup cleanup process.
- NCR-2740 – Time based re-indexing issue on retrieving reports from iView v3.
- NCR-2734 – Formatting issue in pdf custom detailed web report.
- NCR-2730 – Search Engine reports for UTM 9 are not displayed in iView v3 for a particular regex.
- NCR-2725 – Error notification displayed on accessing Sophos iView via SSH client.
- NCR-2710 – Improper heading in pdf report for custom user.
- NCR-2708 – Incorrect time is displayed on schedule reports page for delivered reports.

Supported Languages

English

Download Information

Sophos Up2Date technology makes it easy for you to upgrade your Sophos iView v2 to the latest version.

You can use two methods to apply the available Up2Date package to the system:

- Method 1
    - Log in to your iView web interface.
    - Go to System > Maintenance > Firmware.
    - Click "Check for new Firmware" to download the latest firmware.
    - Once it is downloaded, click "Install" to begin the install. The system will reboot and the new firmware is installed.
    - You can roll back to the previous firmware version by clicking "Boot Firmware" against the non-active firmware. Any configuration changes made between the upgrade and roll back will be lost.
- Method 2
    - Download the Up2Date package from MySophos.
    - Go to System > Maintenance> Firmware.

- Select "Upload firmware" against the non-active firmware to upload the new firmware file and click "Upload & Boot". The system will reboot and the new firmware is installed.
- You can roll back to the previous firmware version by clicking "Boot Firmware" against the non-active firmware. Any configuration changes made between the upgrade and roll back will be lost.

Feedback

- If you want to provide feedback or want to discuss any of the iView features you can post it on our community boards. Please indicate the version you are using to help us (and everyone helping you).
- If you have any feedback on our help, manual, or any documentation (Online Help) please send it to nsg-documentations@sophos.com.
- For any questions or comments regarding this release, please see our online forums for more information.
