Firewall Rule

Rule name *

MAC

Action

Accept

☑ Log firewall traffic

Logs traffic, matching this firewall rule, on the appliance (by default) or on the configured syslog server.

Description

Firewall rule governed by MAC addresses

Rule group

None

Source

Select the source zones, networks, and devices.
The rule applies to traffic from these sources during the scheduled time period.

Source zones *

LAN ⊖

Search engine enforcement

☑ Enforce SafeSearch

Enforce additional image filters   [On ▾]   Prevent potentially inappropriate images, videos, and text from appearing in Google, Yahoo, and Bing search results. You can reduce the risk of exposure to explicit content by enabling additional filters that display only images with a Creative Commons license.
⚠ This option can be enforced by the web proxy only.

☑ Enforce YouTube restrictions

Restriction level   [Moderate ▾]   Prevent access to potentially inappropriate content by restricting which videos are returned in YouTube search results.
⚠ This option can be enforced by the web proxy only.

Policy Quota Status

Allowed time quota   [1 ▾] Hours   [0 ▾] Minutes   Set the maximum allowed time for a single user to browse web content that falls into categories restricted by a quota policy action.

Advanced settings

☑ Enable logging and reporting

☐ Prevent download of files larger than [   ] MB   Values between 1 and 1536 MB are permitted

☐ Restrict login domains for Google apps

Allowed domain(s) [   ]   A comma-separated list of allowed domains for Google apps
⚠ This option can be enforced by the web proxy only.
